Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Lilia E. George. Mrs. George also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publishing and Communications Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

## Digest

**Exports Hit Record \$55.8 Billion in 1995** (see p. 2)--U.S. agricultural exports in calendar year 1995 rose 22 percent to a record \$55.8 billion because of very strong bulk commodity sales and continued strength in high-value product (HVP) exports. Bulk exports jumped to \$25.6 billion and HVP exports rose to \$30.2 billion. At \$11 billion, Japan was the leading market for farm products, followed by the European Union (EU-15) and Canada. The largest year-to-year expansion in U.S. exports was to China, which gained 144 percent to \$2.6 billion.

**Imports Reached a Record \$30 Billion in 1995** (see p. 6)--U.S. agricultural imports increased 12 percent to a record \$30 billion in calendar year 1995. Advances were widespread with especially strong gains in rubber, coffee, and cattle. Coffee, vegetables, beverages, and grain and feeds were the leading imports in value terms.

## Note to Subscribers

Commencing with this issue, the Foreign Agricultural Trade of the United States (FATUS) will be published quarterly with two annual supplements, instead of bimonthly with two supplements. The Economic Research Service plans to phase out the printed issues of FATUS and provide the data in electronic form beginning in 1997.

The data published in the January/February/March issue will include calendar year totals; the April/May/June issue, data from the first 6 months of the fiscal year; the July/August/September issue, 9 months of fiscal year data; and the October/November/December issue will include fiscal year totals.

The export and import data files (tables A-2 and B-3 in the FATUS publication) are available each month on the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229, or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt. The data files will be available on ERS's homepage on the internet. The address is <http://www.econ.ag.gov/>. The files are located under Electronic Publications-Situation and Outlook Reports-U.S. Agricultural Trade.

ERS plans to merge FATUS and U.S. Agricultural Trade Update into a single subscription in 1997. Subscribers will receive the monthly newsletter, and have electronic monthly access to the FATUS data files, and the fiscal and calendar year supplements. Special articles, such as State export shares and export share of production, will be summarized in the monthly update and made available electronically.

## Exports Hit Record \$55.8 Billion in 1995

U.S. agricultural exports in calendar year 1995 rose 22 percent to a record \$55.8 billion because of very strong bulk commodity sales and continued strength in high-value product (HVP) exports. Bulk exports jumped to \$25.6 billion and HVP exports rose to \$30.2 billion. At \$11 billion, Japan was the leading market for farm products, followed by the European Union (EU-15) and Canada. The largest year-to-year expansion in U.S. exports was to China, which gained 144 percent to \$2.6 billion.

### Bulk Exports Highest Since Early 1980's

The United States exported 128.2 million tons of wheat, rice, feed grains, oilseeds, cotton, and tobacco, the highest volume since 1982. Export volume rose 32 percent compared with 1994. Increased feed grain shipments accounted for most of the gain as exports climbed 55 percent to 66.8 million tons. Bulk export value rose 38 percent to \$25.6 billion, the highest since 1981, because of higher export prices for wheat, feed grains, and cotton.

Corn shipments increased 68 percent to 60 million tons, the highest since 1980, because of strong global demand for corn and reduced competition from other exporters. China's withdrawal from the export market and switch to a large net corn importer greatly boosted U.S. corn exports. U.S. shipments to the four largest markets reached records. Exports to Japan jumped 32 percent to a record 16 million tons, shipments to South Korea more than tripled to a record 9 million tons, and sales to Taiwan increased 22 percent to 6.1 million tons. China imported nearly 5.4 million tons compared with 36,000 tons in 1994. The value of corn exports jumped 86 percent to \$7.3 billion as export prices were 10 percent higher than in 1994 because tight corn supplies boosted prices during the year.

Wheat exports rose 6 percent to 32.3 million tons, but wheat export value increased 34 percent to \$5.4 billion. The U.S. export price for wheat rose 27 percent to \$168 per ton in 1995 because tight stocks boosted global wheat prices. The United States exported a record 5.4 million tons of wheat to Egypt. China was the second leading market with 3.6 million tons, followed by Japan (2.8 million tons), the Philippines (1.8 million tons), and Pakistan (1.6 million tons).

Cotton shipments increased 17 percent to more than 2 million tons, but export value rose 39 percent to a record \$3.7 billion because of strong cotton prices. The U.S. cotton export price reached \$1,806 per ton in 1995, the highest since 1981. China purchased 466,000 tons valued at more than \$800 million. Because of production shortfalls in India and Pakistan, which are usually export competitors, the United States exported 27,000 tons and 70,000 tons, respectively to these countries.

Soybean exports increased 26 percent to 22.8 million tons as exports in early 1995 were stronger than normal as Brazilian soybeans were slow entering the global market. A developing tight supply situation then boosted sales at the end of 1995 as the soybean prices rose. The EU-15 was the largest market with exports of 9.4 million tons, up from 7.1 million tons. The United States exported 4 million tons to Japan and 2.5 million tons to Taiwan.

### HVP Exports Surpass \$30 Billion

U.S. exports of HVP commodities increased 11 percent to \$30.2 billion. A 20-percent increase in animal product exports to \$10.9 billion, specifically meats, fats and oils, and hides, accounted for most of the HVP gain. Animal fats and oils increased 39 percent to \$827 million on increased sales to Mexico and Western Europe. Cattle hide exports increased 16 percent to \$1.4 billion on gains to Japan, South Korea, and Taiwan. Horticultural exports rose less than 4 percent to about \$9 billion. Oilseed product exports increased 23 percent to nearly \$3 billion, with vegetable oil accounting for most of the growth, gaining 32 percent to \$1.8 billion.

U.S. red meat exports rose 22 percent to \$4.5 billion. Japan was the leading destination for U.S. red meats, followed by Canada, South Korea, Mexico, and Russia. Export growth was strong to Japan and South Korea, flat to Canada, down more than 50 percent to Mexico, but up more than 260 percent to Russia.

Beef exports advanced 15 percent to \$2.6 billion. Exports to Japan rose 27 percent to a record \$1.7 billion, and exports to South Korea rose 41 percent to a record \$321 million. Beef exports to Mexico fell 63 percent to \$85 million. U.S. pork exports rose 54 percent to a record \$847 million because of strong sales to Japan, which reached a record

\$594 million. Russia was the second leading market for U.S. pork with exports of \$72 million, compared with \$8 million in 1994. U.S. variety meat exports reached a record \$732 million. Japan was the leading market at \$422 million, followed by Mexico at \$74 million. Russia was the third leading market for variety meats at \$64 million.

U.S. poultry meat exports increased 29 percent to a record \$2 billion. Exports to Russia jumped 96 percent to \$607 million, nearly one-third of all U.S. poultry meat exports. Hong Kong was the second largest market at \$403 million. Exports to Canada grew 4 percent to \$169 million, but exports to Mexico fell 28 percent to \$164 million.

#### **Japan Again Leading Market**

U.S. exports expanded at a double-digit pace to eight of the top 10 markets, Canada and Mexico being the exceptions. Exports to Japan reached a record of nearly \$11 billion, 18 percent higher than in 1994. Japan was the leading market for both bulk and HVP commodities, \$4.5 billion and \$6.5 billion, respectively. Exports to the EU-15 grew 23 percent to \$8.9 billion, the highest since

1983. Canada was the third leading market at \$5.7 billion, 4 percent higher than in 1994. Exports to South Korea climbed 61 percent to \$3.8 billion, becoming the fourth largest market and surpassing Mexico. Bulk exports to South Korea increased more than 100 percent to more than \$2.1 billion. Exports to Mexico fell 22 percent to \$3.5 billion because of the peso devaluation at the end of 1994 and the subsequent economic downturn during 1995. Bulk exports declined 8 percent in 1995, but HVP exports fell more than 30 percent.

China was the sixth largest market at \$2.6 billion. Bulk exports jumped 145 percent to \$2 billion, and HVP growth was nearly as strong at 139 percent. Exports increased 21 percent to both Taiwan and Hong Kong, \$2.6 billion and \$1.5 billion, respectively. Exports to Egypt rose 66 percent to \$1.4 billion because of strong bulk exports. Russia was the 10th leading market at \$1 billion. Exports to Russia rose 64 percent because of strong meat demand. In a substantial turnaround in commodity composition of exports to Russia, HVP exports accounted for 90 percent of the U.S. agricultural total. *(Joel Greene, Trade Analysis Branch, 202-219-0816)*

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Item	January-December		December	
	1994	1995	1994	1995

## **Imports Reached a Record \$30 Billion in 1995**

U.S. agricultural imports increased 12 percent to a record \$30 billion in calendar year 1995. Advances were widespread with especially strong gains in rubber, coffee, and cattle. Coffee, vegetables, beverages, and grain and feeds were the leading imports in value terms.

Rubber was one of the fastest growing import segments in 1995, reaching \$1.6 billion, compared with \$965 million in 1994. Total import volume was down slightly from 1994, but value surged on higher rubber prices due to supply shortages. Total rubber imports were over 1 million tons, and Indonesia, Thailand, and Malaysia were the leading sources, accounting for 94 percent of the total.

Coffee continued to be a dynamic commodity in 1995 as value increased 31 percent to \$3.3 billion and import volume gained 55,000 tons to 990,000 tons. Mexico edged out Colombia as the leading import source with shipments of 176,000 tons valued at \$592 million, compared with Colombia's 151,000 tons valued at \$536 million. Other leading coffee suppliers were Brazil and Guatemala. Brazil, normally the leading source, was beset by poor growing conditions which tightened supplies of high quality beans.

Vegetable oil imports gained 23 percent to \$1.4 billion although volume was little changed from 1994. Increasing consumer demand, especially in the Pacific Rim, continued to tighten vegetable oil supplies and boost world prices. Higher prices for olive oil from the European Union (EU-15) boosted import value, even as volume declined. Rising coconut oil import volume and value from the Philippines also contributed to import growth.

Although coffee was the leading import commodity by value, vegetables trailed by only \$200 million with 1995 vegetable imports at \$3.1 billion, 14 percent higher than 1994. Most of the growth was due to fresh vegetable imports from

Mexico, which were up 20 percent to \$1.2 billion because of increased shipments of tomatoes, cucumbers, peppers, broccoli, and onions. Large supplies due to favorable weather in Mexico, low production in Florida as a result of flooding and cold, and the peso devaluation combined to boost U.S. imports from Mexico.

Total beverage imports in 1995 were valued at \$2.4 billion, an 11-percent increase from 1994. Wine accounted for \$1.2 billion of the beverage imports. The largest source, the EU-15, had small gains, although other countries, notably Chile and Australia, shipped more wine than in 1994. Malt beverage imports were also \$1.2 billion, up 11 percent from 1994. The Netherlands, Mexico, and Canada were the major sources, accounting for 96 percent of 1995 malt beverage imports.

Grain and feed imports volume was steady on lower prices. Value was \$2.4 billion in 1995; \$1.3 billion came from Canada. Processed feeds, wheat, oats, and barley were the major Canadian grains shipped to the United States. The EU-15 followed Canada in volume.

Imports of meat declined 13 percent to \$2.3 billion due to large domestic supplies of beef, the primary meat imported, and low U.S. prices. Total beef import value fell 20 percent to \$2.5 billion. Beef from Australia, the largest supplier, was down 36 percent from 1994 to \$386 million and Canadian shipments fell 5 percent to \$359 million. Production in Australia was curtailed by an extensive drought.

The EU-15, with shipments of \$5.9 billion, was the largest source for agricultural imports in 1995, accounting for 20 percent of the \$30 billion U.S. agricultural imports. At \$5.6 billion, Canada accounted for 19 percent of total import value. Shipments from Mexico of \$3.8 billion netted it third place with a 13-percent share. Indonesia (\$1.4 billion) and Brazil (\$1.1 billion) followed with shares of 5 and 4 percent, respectively. *(Tom Capehart, Trade Analysis Branch, 202-219-1262)*

# ERS AutoFAX

Another Service for Users of

ERS Information and Data

---

Timely information and data from ERS are as handy as your fax machine! A call from your fax to the ERS AutoFAX gives you immediate access to documents covering crops and livestock, rural affairs, farm sector economics and many other topics. Enter your selections using the instructions below and AutoFAX will fax these documents to you, **free**, in the same call!

## How to use AutoFAX—

1. Use the handset and Touch Tone keypad attached to your fax machine.
2. Call 202-219-1107 and listen for the voice prompts.
3. Enter document ID number 0411 and confirm when prompted.
4. Enter # to complete your selections.
5. When prompted, press the "start" button on your fax machine and hang up the handset.
6. In moments, the 0411 "help" document will be on its way to you with information on the contents and use of AutoFAX.

Available now, ERS AutoFAX is online 24 hours a day, 7 days a week for your convenience.

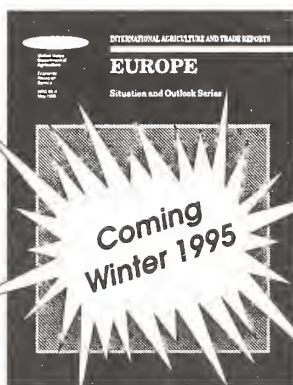

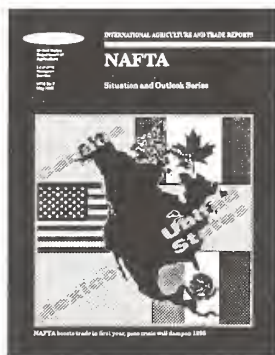

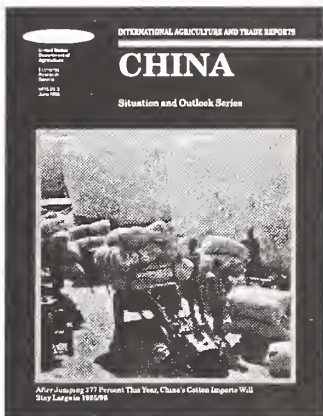

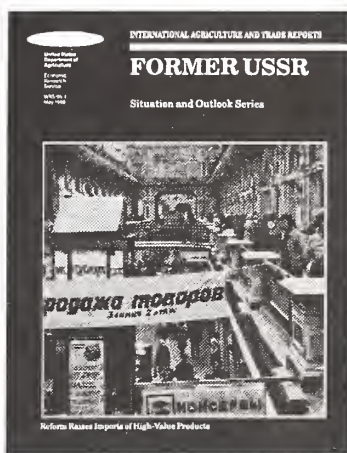

---

## **ERS AutoFAX**

## **202-219-1107**

---

AutoFAX works with most common fax machines. For assistance or to report system problems, please call the system manager at 202-219-0232 (8:00 a.m. - 4:30 p.m. ET).

# You need the *International Agriculture and Trade Reports to:*

- understand what spurred China's imports of cotton and soybean oil
- see if you should bank on continued Russian wheat imports
- find out how the peso crisis affects U.S. agricultural exports
- get a handle on U.S. agricultural trade with Europe
- discover new markets for high-value products in the former Soviet Union
- learn what factors will affect future trade within NAFTA
- decide if you should count on corn exports to China
- determine where EU agricultural production and trade are headed

This four-report series includes *China*, *Europe*, *Former USSR*, and *NAFTA*. USDA economists draw on original foreign source materials to explain how basic forces are changing agriculture and agricultural trade around the world. Each report anticipates short- and long-term production, consumption, and trade of the region's key commodities. Detailed analysis backs up forecasts on how agricultural policies and structure, as well as macroeconomic and trade policies, will affect world food and fiber markets. Each report includes consistent, up-to-date data bases on key agriculture and trade indicators.
